Course: IT202-007-F2024

Assignment: [IT202] Module 1 Getting Started

Student: Datha V. (db624)

## Submissions:

Submission Selection

1 Submission [submitted] 9/5/2024 10:29:22 PM

## Instructions

^ COLLAPSE ^

Overview Video: <https://youtu.be/3pDB8m62tgM>

1. Create a repository on github, use the format `ucid-course-section` as the repository name.
2. Make sure it's set to private
3. Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID **MattToegel** and send an invite; if your section has a grader do the same for their github username (refer to course announcements)
  1. **Note:** Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
4. From the terminal / command line create a new branch called **M1-GettingStarted**
5. Create a README.md file and add it to the branch
6. Fill in some basic details:
  1. Course/Section
  2. Your name (first is fine)
  3. Brief info about yourself you'd like to share
7. Hint after creating the file
  1. `git add README.md`
  2. `git commit -m "my readme file"`
  3. `git push origin M1-GettingStarted`
  4. Create a pull request from this branch (via github.com)
  5. Don't merge/close the pull request yet
8. Fill in the below deliverables.
9. Once finished, ensure it's saved and click the "Export" button.

10. Move the generated PDF into your local repository folder at any location of your choosing.
11. Do the following commands
  1. `git add .` (this will add all changes)
  2. `git commit -m "adding output file"`
  3. `git push origin M1-GettingStarted`
12. Go back to github and merge the pull request that was opened
13. Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

**Note:** Having the submission saved and active keeps it eligible for grading.

Task #1: Talk about what you learned during this module, anything interesting, new, etc.

Weight: ~50%

Points: ~3.00

^ COLLAPSE ^

**i** Details:

Should be at least a few sentences for full credit

≡ Task Response Prompt

Response:

I learned how to install extensions on Visual Studio Code. I also learned how to create branches and commit changes to a repository. I didn't know git and github aren't the same thing before this module.

End of Task 1

#### Task

Group: Reflection

Task #2: Did you have any issues? If so, how did you resolve them? If no issues, just type "no issues"

Weight: ~50%

Points: ~3.00

## ≡ Task Response Prompt

Response:

One of the issues I've been facing is that I need to provide my ssh key manually for every session.
